

# Elluminate Live!<sup>®</sup>

## enterprise edition<sup>™</sup>

**Need to train more employees, customers, and partners  
in less time with an ever-shrinking budget?**  
Increase collaboration while reducing travel and teleconferencing with  
Elluminate Live!<sup>®</sup> Enterprise Edition<sup>™</sup>. **Experience the difference today!**

### Enable Dynamic Collaboration Throughout Your Enterprise

Tired of the cost and hassles of airplane travel and teleconferencing? With Elluminate Live! you can reach employees, partners, and customers in new ways. Improve information exchange, encourage idea sharing, and facilitate collaboration—while reducing expenses. And that means a rapid return on your investment.

Maintaining the effectiveness of face-to-face communication with interactive online staff meetings, sales presentations, employment interviews, brainstorming sessions, enterprise-wide events, and more. With Elluminate Live! you can empower your employees to be more productive, effective, and efficient in every department of your real-time organization.

*"In Elluminate's first week of use, the savings in travel expenses alone paid for the entire annual contract."*  
**Pan American Health Organization**

### Extend Education Beyond the Corporate Classroom

Why live eLearning? Because it's even more effective—and affordable—than traditional classroom or self-paced training. Whether it's new product training, professional development, sales demo, or user conference, Elluminate Live! is an intuitive, moderator-led environment that delivers real-time, interactive education that encourages real learning.

*"We consider Elluminate Live! a very cost-effective way to get our training out there, and we can provide an experience that's very similar to the traditional classroom environment but even more flexible. Our training enrollments are really taking off."*  
**Sun Microsystems, Inc.**

### What makes Elluminate the clear choice for live eLearning and web collaboration?

- Best-in-class user experience, with *No User Left Behind*<sup>™</sup> technology that ensures everyone is in sync and no content is ever lost
- Crystal-clear, full-duplex audio that replicates interaction of face-to-face classroom
- Universal access for Microsoft Windows, Mac OS, Linux, and Solaris users
- Feature-rich learning environment designed with pedagogy in mind that enhances distance learning and extends the physical classroom
- Advanced moderator tools for easy content creation, presentation, and control, along with unprecedented moderator awareness
- Collaborative Communication Framework (CCF) for optimal connectivity, reliability, and performance, regardless of Internet connection speed
- In-sync communication that supports all teaching and learning styles for an engaging learning environment
- User-friendly, intuitive interface that's easy to use and customize
- Accessibility features that enable users with disabilities to fully participate
- Functionality that facilitates small group interaction, simplifies large group management, enables blended learning, and fosters social networking
- Rapid return on investment (ROI), with increased productivity and decreased travel and phone costs
- Industry-leading customer service and a community of users where you can share your experiences and learn from others

# V8

## How does Elluminate Live! engage more people in more ways?

- **Crystal-clear, full-duplex audio** supports simultaneous speakers and delivers synchronous voice over the Internet that's accessible at low bandwidths and automatically optimized for use with other classroom elements.
- **Rich media support** enables live video via high-resolution web cam, multimedia content, and synchronized web browsing with individual interaction.
- **Shareable, interactive whiteboards** include drawing tools and image and PowerPoint import. Copy and paste anything from your desktop onto the whiteboard on the fly. Displayed objects are dynamic, so they can be edited, grouped, layered, or aligned.
- **Interactive, indexed recordings** enable students who missed a session to attend at their leisure. Playing back recordings is just like being there, with everything in the session recorded and played back as it happened. Indexed recordings allow users to easily search and navigate content.
- **Application sharing** allows instructors and students to share applications, entire desktop, or desktop region. Give remote control to students to facilitate hands-on learning.
- **Synchronized notes** provide ability for each user to take notes during a live session, add to or edit them during recording playback, share with others, and save to a file for exam review.
- **File transfer** allows easy sharing of audio, video, and application files with participants, even during recorded sessions.
- **Breakout rooms** enable students to work in small groups with private audio, whiteboard, quizzing, and application sharing. Instructors can easily move students and content between rooms.
- **Quiz Manager** enables instructor to conduct interactive quizzes and surveys, load and store tests, and collect result statistics.
- **Chat** offers instant public and private messaging to one, all, or a selected group of participants. Messages can be filtered, time-stamped, and saved to track session communication.
- **ESP (Elluminate Sensory Perception) moderator tools** put the instructor in control of both small and large groups with attendee lists, participant sort, permission granting, instant polling, and sequenced hand raising. Activity and emotion indicators inform instructor of student status.
- **Accessibility features**, including multiple streams of closed captioning, enlarged video, auditory event notification, short-cut keys, and screen reader access, enable disabled users to more fully participate.
- **User profiles** enable attendees to share contact information with others in live and recorded sessions, helping to create a sense of community that facilitates social networking.
- **Language translations** include Spanish, French, Chinese (Simplified), Japanese, Portuguese (Brazilian), German, and Arabic, with additional language support as it becomes available.
- **Robust performance** enables students to get whiteboard content quickly, share applications more effectively, and reconnect automatically if Internet connection is lost.

## Transform the Learning Experience

Elluminate Live! is built specifically for live, multi-media, many-to-many collaboration. Our unique Collaborative Communications Framework (CCF) automatically ensures that all participants are in sync, regardless of computer platform or Internet connection speed. Our *No User Left Behind* technology means all participants, even those with disabilities, always get the same superior quality, performance, and dependability.

From full-duplex audio, live video, and shared whiteboards to instant messaging, application sharing, and breakout rooms, all Elluminate Live! components are tightly integrated to provide the ultimate interactive environment for online meeting and training. Whether you have two participants—or two hundred—Elluminate Live! enables world-class communication, collaboration, and education that transforms the online experience.

*"Elluminate Live! has performed flawlessly. It has enabled us to expand our capabilities without hiring more people. Like the Internet and email, we'll soon wonder what we did without it!"*

**EMD Biosciences**

## Need Just a Single Room?

Elluminate Live! is also available in single-room, personalized configurations that are perfect for one-on-one collaboration, team meetings, and training for up to ten participants. Contact us today for more information.

## Minimum System Requirements

### Server Requirements (100 Concurrent Users)

- Windows 2000/2003 Server, Mac OS X 10.4, Solaris 10, Red Hat Enterprise Linux v4 for x86, Novell SUSE Linux Enterprise Server 9/10
- 1.2 GHz Pentium 3 (Windows, Linux, or Solaris), 2 GHz G5 (Mac OS X and Mac OS X Server), 750 MHz UltraSPARC II (Solaris)
- 512 MB of RAM
- Static IP address with 1-2 Mbps outbound bandwidth for every 25 users
- 400 MB of free disk space

### UltraSPARC Solaris Client

- Solaris 10 (SPARC only)
- UltraSPARC IIc 300 MHz
- 128 MB RAM

### Red Hat Linux Client

- RHEL 4
- Pentium III 1 GHz processor
- 256 MB RAM

### Novell SUSE Linux Client

- SLES9/SLES10
- Pentium III 1 GHz processor
- 256 MB RAM

### In addition, all clients require:

- 20 MB free disk space
- Soundcard with speakers and microphone or headset
- 28.8 kbps Internet connection

### Windows Client

- Windows 2000/XP/Vista
- Pentium III 500 MHz processor
- 256 MB RAM

### Mac OS Client

- Mac OS X 10.2.8/10.3.9/10.4
- G3, G4, G5, or Intel processor
- 256 MB RAM
